

## Specialty Products Summary

Product	Product Type	Type of Metal	Machining Applications	Operating Concentration	Performance Features	Comments
NC-9003	Acid Rust Stripper/	Ferrous and non-ferrous metals	Rust stripping and aluminum brightener	2-25%	Safer to use and dispose as compared to mineral acids	Can be painted over without rinsing, designed for dip tanks,
NC-9009	Neutral De-Rusting	Ferrous	Neutral rust stripper	2-25%	Safer to use and dispose as compared to mineral acids	Can be painted over without rinsing
NC-1244	Paint Stripper	Ferrous and non-ferrous metals	Paint stripper	10-40%	Specially designed for aluminum paint stripping	Can be used for stripping paint from aluminum and ferrous metals
NC 3510	Paint Stripper	Ferrous and non-ferrous metals	Used along with NC 1244	0.5-5%	Helps penetrating NC 1244 under the paint	Helps to minimize water evaporation from high temperature baths
NC-1710	De-Duster	N/A	Water dispersible dust suppressant	5-20%	Economical and water soluble	Non-hazardous and environmentally safe
NC-1776	Hand Soap	N/A	Hand soap	Designed to be used as received	Advanced wetting agents enhances soil and grease	Free rinsing and no slippery after-feel

\* Non-ferrous metals do not include magnesium and other highly active metals. Check compatibility prior to use.
